

Here is the URL and step description of how to get the error. Please be sure to use jre 8u 45 (u60) has the same behaviour. U33 did not.

1) Enter: <http://kismetal.softbase.dk:8090/pls/apex/f?p=SBS>

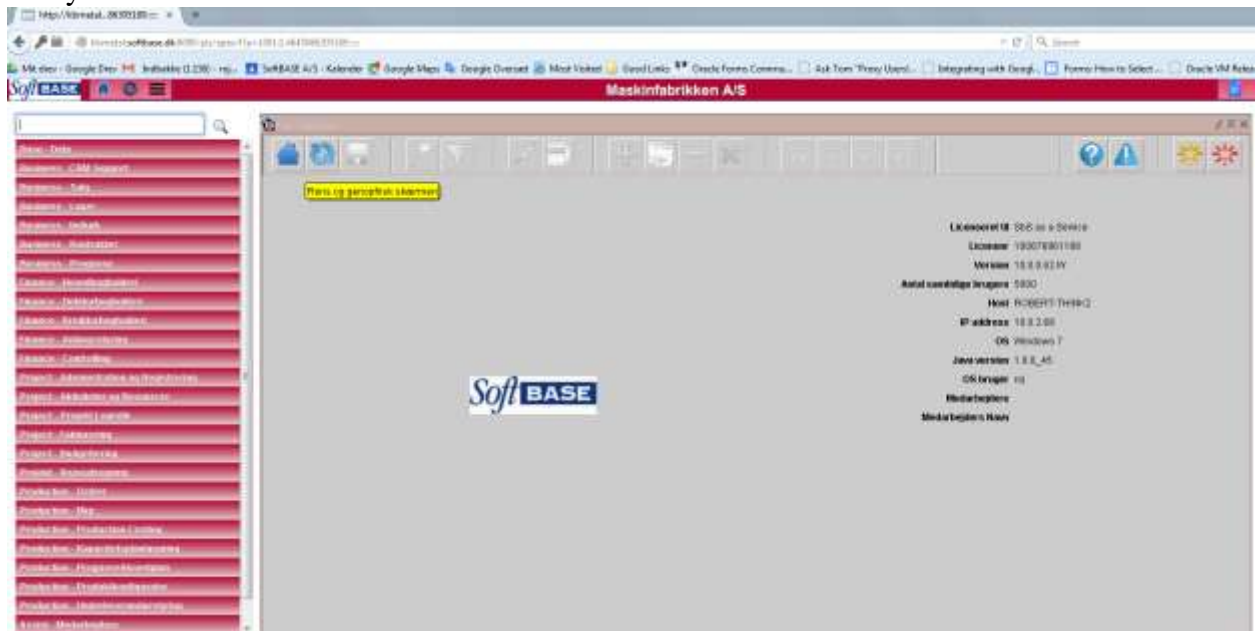

2) You are redirected to a login page:

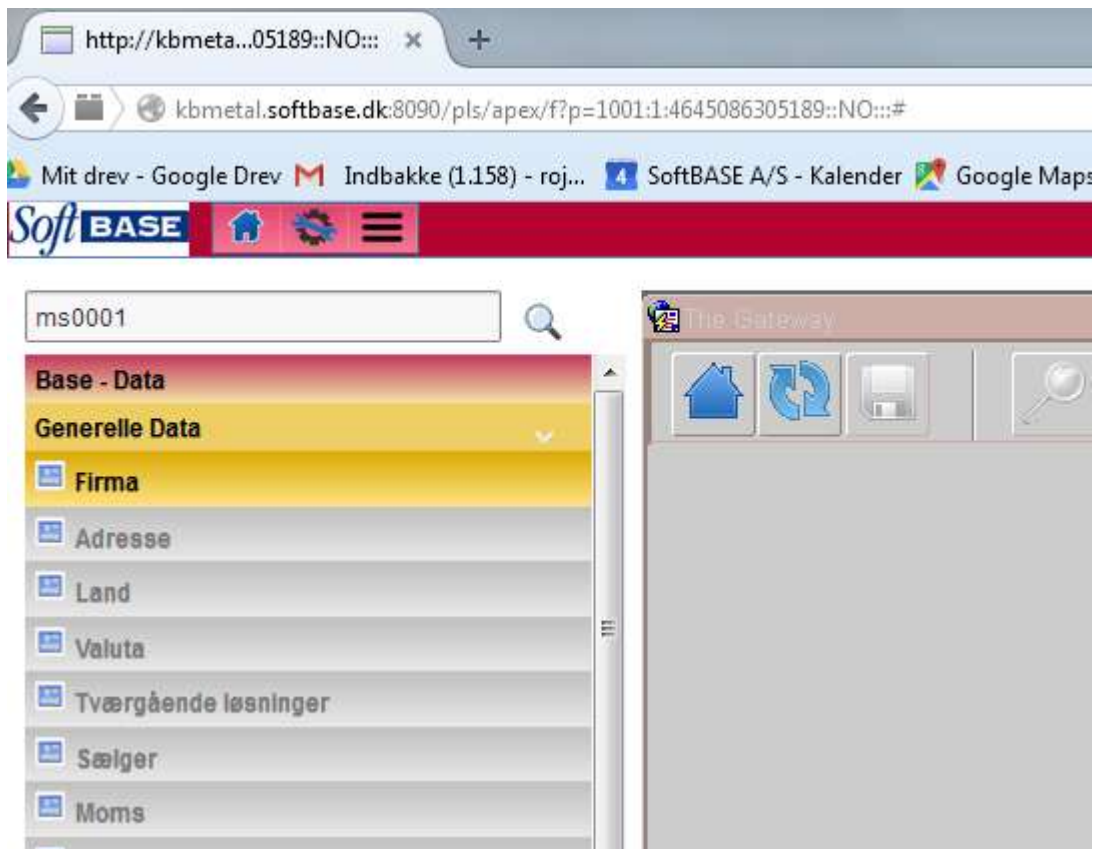

Enter mf01plan as user and mf01plan as password (Case sensitive).

3) You come into an apex page with an applet. The jar files will load the first time, but that is fairly fast.

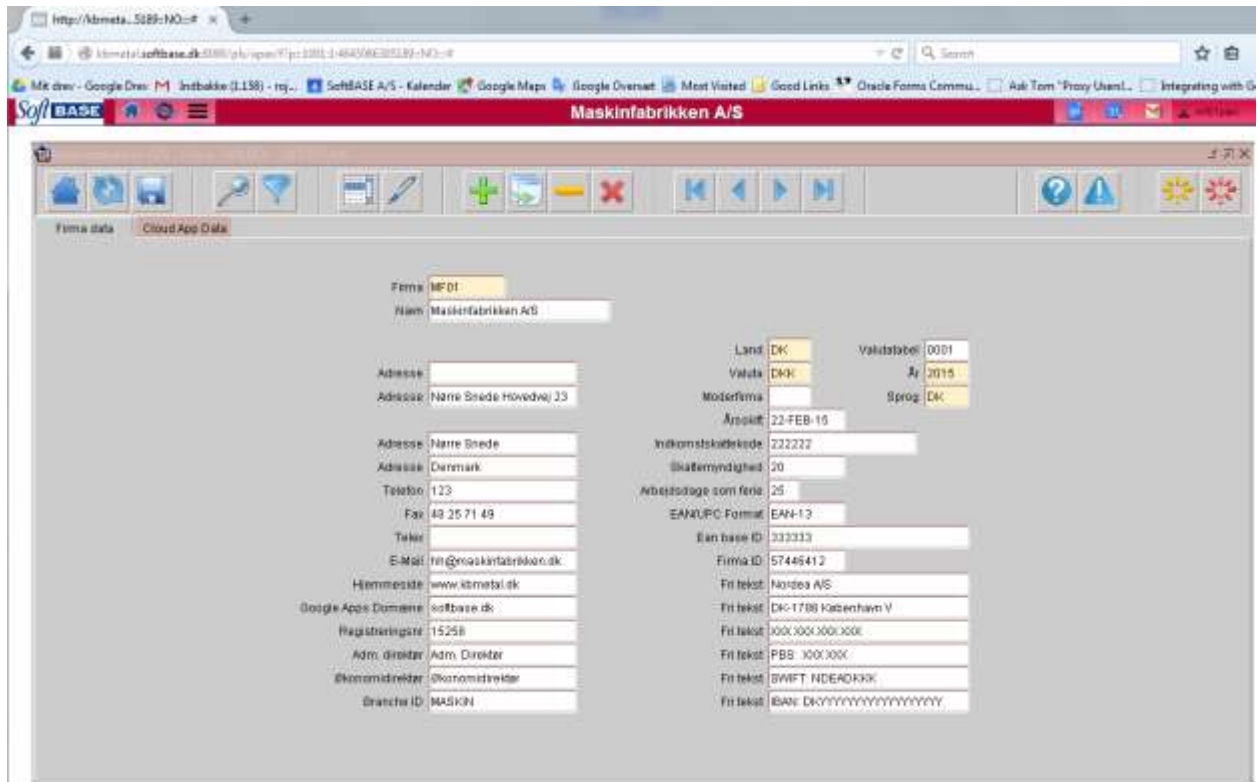

4) Now open up a form (any form) and the behaviour is discovered.

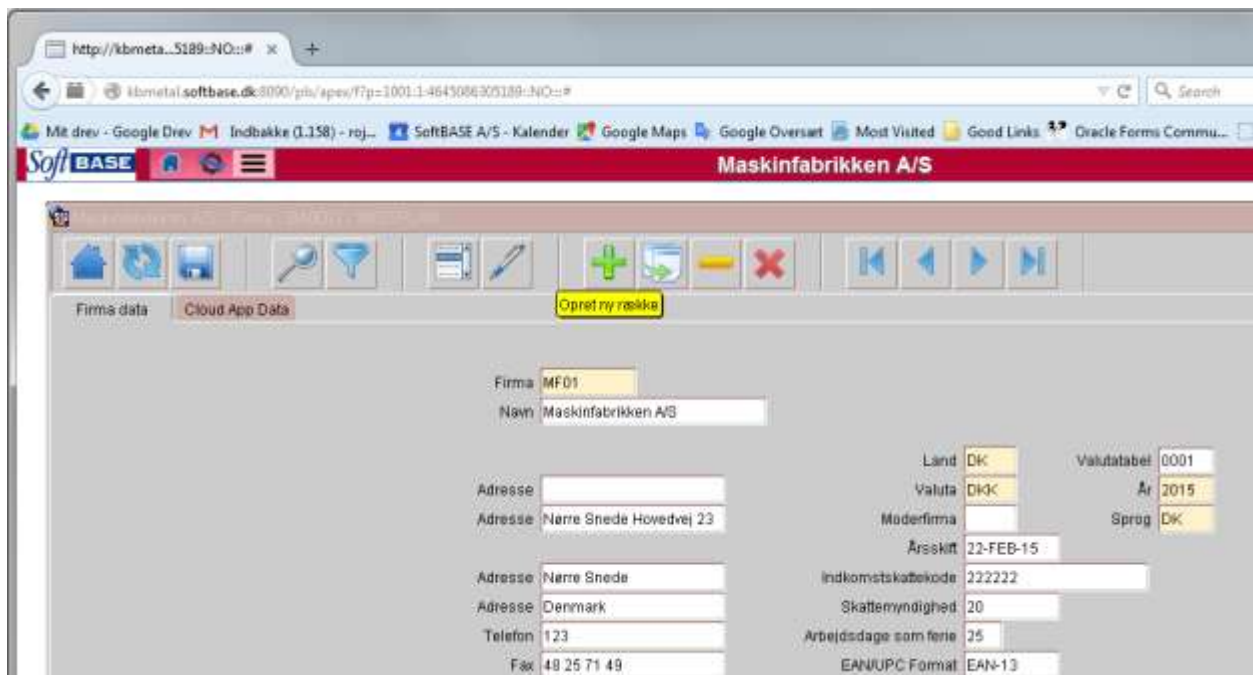

For Instance in the menu: Choose Base - Data -> Generale Data -> Firma

5) And the Form loads after extremely long (several minutes), because of the image icons in sbs_icons.jar

The Form opens eventually

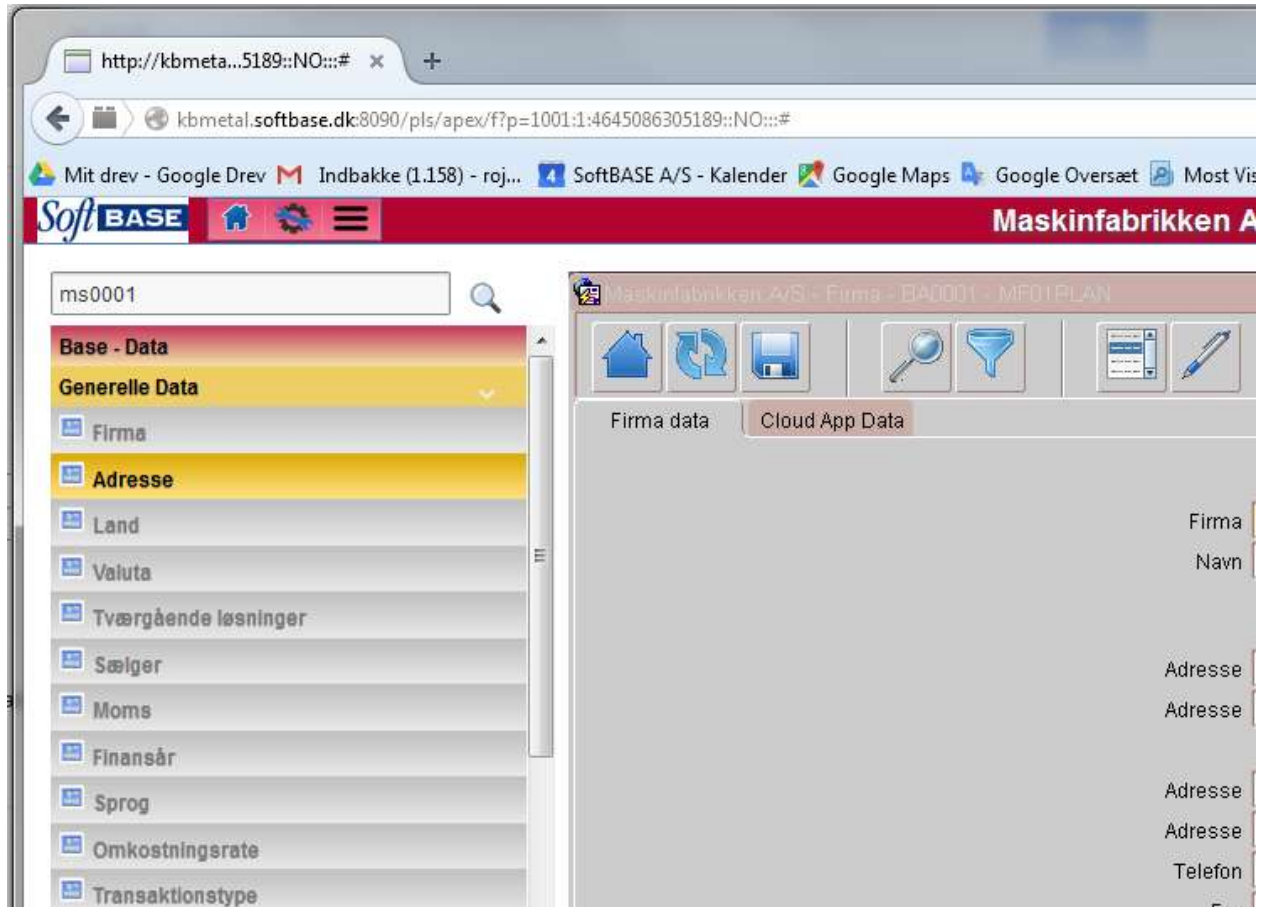

6) Now repeat the process by opening another Form. Click the Menu  ..

The screenshot shows a web browser window with the URL `http://kbrmeta...5189:~NO::#`. The browser's address bar and search bar are visible. The page title is "Maskinfabrikken A/S". The browser's toolbar includes icons for home, back, forward, search, and print. The page content is a form titled "Firma data" with a "Cloud App Data" tab. A yellow button labeled "Opret ny ræske" is highlighted. The form contains the following fields:

Hi Robert,

Can you please share the exact url to the applet to be able to observe the behavior?

Thank You,
Pardeep
